

Now you can have an objective, specific, computerized framework of Workers' Comp decision-making that gives you "court-proof" measurement of claim authenticity, plus the advanced technology you need to help improve life quality and restore active lifestyles.

Ariel Kinematics' 2D & 3D digital video kinematic analysis services, previously available to only top-level athletes, is now being used to assist claim management in decisions about total body and body segment functioning... at a fraction of the costs involved with subjective decisions... with **over 10,000 motion analysis systems worldwide.**

Ariel Kinematics professionals provide a combined total of over 100 years of objective, computerized, motion and performance analysis experience in practical applications for physicians, employers, case managers, claims adjusters, athletes and attorneys.

When You Need...

- Verification of injured worker reliability
- Objective Functional Capacity Evaluations for early RTW
- Objective accuracy of medical diagnosis and treatment benchmarking
- Pre-surgery determination of medical necessity –to improve outcome odds
- Ergonomic job/worksites analysis, post-offer physical capacity evaluations

We Will Help You...

- Close claims earlier, with reduced medical and indemnity costs
- Reduce lost workdays with "remain at/early RTW" decision data objectivity
- Determine safe alternative, modified or transitional work duty assignments
- Know when to justify, redirect or terminate treatment
- Verify subjective complaints
- Identify when MMI has been reached
- Objectively and accurately determine levels of disability or impairment

Ariel Kinematics is America's recognized leader in cost containment services and in the performance of mobile, independent, objective FCEs

Our Clients Include: U.S. Olympic Athletes, NASA, Travelers, Kemper, Liberty Mutual, PMA, RskCo, Aetna, Cigna, Prudential, Zurich, AIG... plus hundreds of public and private employers, as well as professional and amateur sports organizations.
